Sampling should start within 5 days of completion of development. So if the schedule holds, we should be sampling right after Labor Day.

Tom

*Tom,
One more question. Do you have an estimate of when the sampling will start on the wells? I see the schedule for the development below.*

Rene,

A quick update and projection for the remaining work. Cascade is installing the repaired hydraulic pump on the rig today. Drilling and well installation activities will resume tomorrow, Tuesday, August 13. We project that the remaining five wells (YVD-3, -5, -6, -1, and -2) will be drilled and installed by August 30, provided no other significant delays occur. In addition, well development will begin August 25 and coincide with the drilling oversight that ARCADIS is providing during that week.

Please let me know if you have any questions.

Thank you

Tom
